(contents continued)

Expression and polarization of VGF in developing hippocampal neurons
D.L. Benson and S.R.J. Salton (USA) 219
Development of blood-brain barrier tight junctions in the rat cortex
U. Kniesel, W. Risau and H. Wolburg (Germany) 229
Postnatal development of adrenergic terminals in rat locus coeruleus, with special reference to growth of noradrenergic neurons
N. Saito, M. Shimada, K. Kitahama and T. Maeda (Japan, France) 241
Effects of in utero cocaine exposure on the expression of mRNAS encoding the dopamine transporter and the D1, D2 and D5 dopamine receptor subtypes in fetal rhesus monkey
W.S. Choi and O.K. Rønnekleiv (USA) 249
The hierarchical development of monkey visual cortical regions as revealed by the maturation of parvalbumin-immunoreactive neurons
F. Condé, J.S. Lund and D.A. Lewis (France, UK, USA) 261

Short communications

Studies of dentate granule cell modulation: Paired-pulse responses in freely moving rats at three ages
J.D. Bronzino, J.H. Blaise, R.J. Austin-LaFrance and P.J. Morgane (USA) 277
Dimorphic expression of calbindin-D_{28K} in the medial basal hypothalamus from perinatal male and female rats
E.D. Lephart (USA) 281
Ontogeny of regulatory neuropeptides in the bullfrog taste organ
T. Kusakabe, H. Matsuda, T. Kawakami, N. Syoui, K. Kurihara, T. Takenaka and H. Sawada (Japan) 285
Genesis of the frog retinal pigment epithelium
L.D. Beazley, M. Tennant, T.L. Tomlin, J.M. Preuss, L.-A. Coleman and S.A. Dunlop (Australia) 290
Neonatal capsaicin treatment alters the metabolic activity of subcortical somatosensory structures of developing rats in response to whisker stimulation
C.-C. Wu (USA) 295
